Gardening for Wildlife

Kailua-Kona, Hawaii; June 5, 2007

Hualalai Academy has been designated an official Wildlife Habitat site by the National Wildlife Federation. This certification honors the school's environmental stewardship in creating a landscape hospitable to wildlife. Kindergarteners along with 1st and 3rd graders have created and tended three separate gardens with flowers and vegetables, including native Hawaiian endangered and endemic species. A nature trail has also been developed and will be a focus of study and further improvements for next school year's classes.

Along with these efforts, the school's beautiful landscape draws many birds and butterflies to the campus which provide a source of enjoyment and cross-curricular study for students in all grades.

Hualalai Academy is a fully accredited, K through 12th grade college preparatory school that empowers students to develop their academic, artistic, social, and physical skills. For more information about the academy, please call 326-9866.
